Years – Inventions – American Idealism for the Help, all the Help.

Place here an image of Sirohi and that is then psychoanalysis for a simple avant-garde – Black power man, all power to Algeria, and Cuba and China – finance and ideas for America – thank you Indian capitalists – venceremos.

By Shomit Sirohi

I. Winning

A brief smile from Lenin all the time. Trotsky is busy reading when I am asleep. Mao is busy imitating his Chinese on radio.

II. American Idealism from Communists

I feel they are nice people, just nice. Get that, black people get them with Sirohi. Two axioms for us – nice, and black. Sirohi adds, all the poetry you like. We are just divided by schools, children learn in elite schools, pick up Judaism, Trotsky and black rights, and the strong swerve of feminism. The rest is radical financial behaviour – not that one million or four million but all the time. I call this our scale.

III. Inventions for two parties – with a excess for black power and a infinite height of in fact a balance on the feet but standing – Women. All your curation, clothes, and etc. etc. If you appear feminine, we add Drag poems.

I. Be inspired.
II. That is all.
III. An example – Sirohi gives four formats, maybe five or six – the computer, software on it, websites together with tv, radio and games, some pure inventions we talk on.
IV. Now pick up the jazz – its formalism and then develop works that way.

Imagine a small microphone and talk to it, Brecht. If you prefer listen to it. All the speeches, all of that.

It will follow the first line of course.

A Sirohian speech is for Israel as well.

A pure example –

‘You know what they were saying, there will be dead philosophers. And the game goes on, dead politicians of the left as well.’
